

Communication Challenge #2

MIRANDA PACHINI, GERMAN COLLADO

Seasonally Adjusted Auto vs. Light Truck Sales

Auto and Truck Trends over 25 years

Auto and Truck trends follow a pattern that shows growth and decline in sales over decades

Year with the Largest Decline in Auto Sales

Auto Sales Experience a Sharp Fall in 2009

- The Largest Drop in Auto Sales is in 2009
- What happened in 2009 that caused the drop?

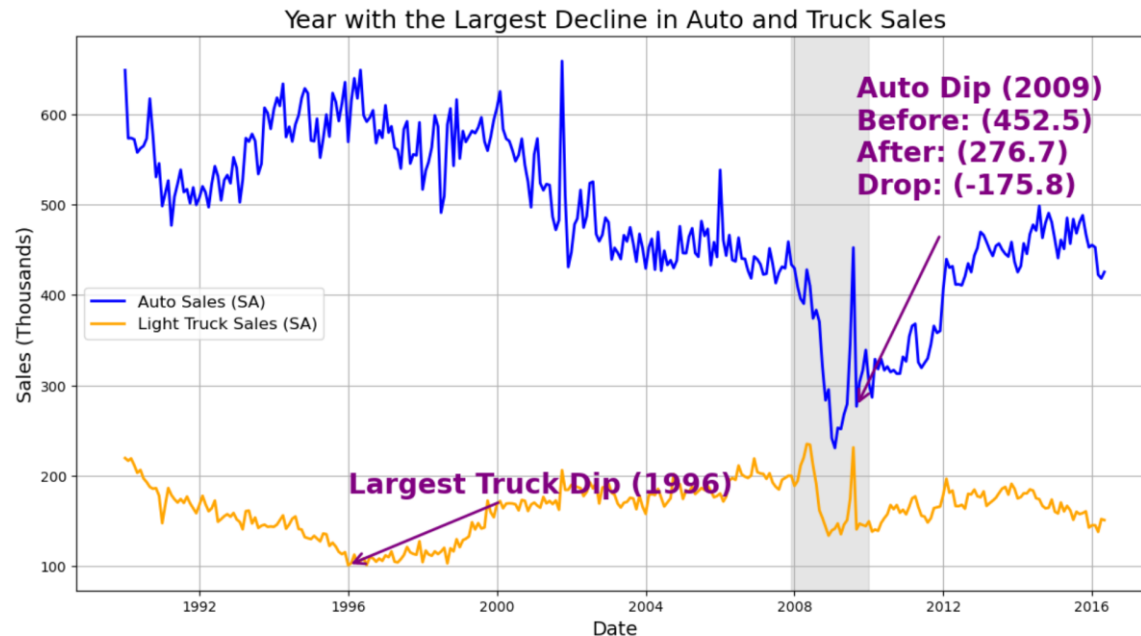

Year with the Largest Decline in Auto Sales

Turning Point: 2008 Recession

- The year before the economic recession auto sales were around \$453k
- The year after the economic recession auto sales have dropped to around \$277k
- That is a \$176K drop

Truck Sales Largest Dip in 1996

- Truck Sales experienced the largest dip in 1996, but we can clearly see that the Recession had a negative impact on truck sales as well.
- How Large of an impact?

Year with the Largest Decline in Auto and Truck Sales

Recession Hit Auto and Truck Sales Equally at a 40% Decline

- Although less severe than in 1996, we can clearly see a drop happening during the same 2008-2009 Recession period.
- Truck sales before the recession were around \$231k and the year after at about \$141k. This is a 39.2% loss in truck sales.
- Auto sales fared slightly better with about 38.9% loss, but overall, we can conclude that the economic recession impacted both auto and truck sales equally.
